DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: On line 11 of claim 1, "the selected channel" lacks antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-18 are directed to methods for processing data to provide a forewarning of a critical event. Each of the methods claims are directed to mathematical algorithms, which are abstract ideas. Claims directed to abstract ideas may be statutory if the claims include limitations showing a practical application. The practical application may be demonstrated by a physical transformation or by producing a result that useful, concrete and tangible (US Patent and Trademark Office OG Notices: 22 November 2005). Since claims 1-18 do not recite limitations showing a practical application by a physical transformation or by producing a concrete, useful and tangible result, the claims are non-statutory.

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 10 have been considered but are moot in view of the new ground(s) of rejection.
